HEADEND

The all-new TDcH Compact Headend

- Exquisite engineering, finely tuned for perfect performance
- Your natural choice for swift, efficient TV distribution
- Save time and costs, with fast, easy installation and remote management
- Compact design fits elegantly into 19" racks
- Reliable, innovative headend expertise from TRIAX

Compact excellence

A sleek combination of intuitive software, advanced multiplexing and integrated SCR multiswitch

- Optimised channel setup with advanced multiplexing and IP Pool technology
- Integrated SCR multiswitch* for cost, time and space saving
- No need for retuning TV sets in rooms thanks to PID Management
- EPG Management ensures full electronic programme information for better user experience
- Pre-configured for quick installation and reduced costs
- Central decryption with CI slots, Free-To-Air version available
- Multiple language service allows for multiple distributions of a service with different audio (language) tracks

*) Software update available September 2021

Smooth integration

Infinite possibilities

Built on our cutting edge new software platform, the opportunities with TDcH are endless

Complimentary updated software offers new and existing customers additional functions and benefits, along with new hardware configurations to match your requirements.

- TDcH will evolve to make new versions, functions and benefits available
- Recent software update added seven new functionalities at no extra cost to already installed products
- A new hardware version meeting the need for cable and terrestrial signal reception, and the option to distribute not only QAM but also COFDM

With 70 years of trailblazing technology, we're proud to be headend experts

TRIAX headends are the truest expression of our values of reliability and innovation. They're developed from the ground up at our headquarters in Denmark, with over 24,000 sold in the last decade alone.

With the TDcH compact headend, we now have a headend to suit the requirements of every installation size and budget.

To find out more about the new TDcH compact headend or to discuss your next installation, visit us online or contact us today.
